

```

interface BooodDetails {
  id: number,
  title: string,
  description: string,
  author: string
}

async function deleteBookById(id: number) {

  const response = await fetch("http://localhost:7201/Book/DeleteById",
{
  method: "DELETE",
  headers: {
    "Content-Type": "application/json"
  },
  body: JSON.stringify({"id":id}),
});
  if(!response.ok){
    console.log("Error");
  }
  const res_data = await response.text();
  console.log("del",res_data);
  await getAllBooks();
};

async function getAllBooks() {
  const response = await fetch("http://localhost:7201/Book/GetAllBooks",
{
  method: "GET",
});
  if(!response.ok){
    console.log("Error");
  }
  let bood_details: BooodDetails[] = await response.json();
  bood_details.forEach((thisBook: BooodDetails) => {
    console.log(`Title : ${thisBook.title} Author : ${thisBook.author}
description : ${thisBook.description}`);
  })
};

```

```
deleteBookById(11);
```

Output :

```
